

## New Paperless System Now Available for Bookings Made on Galileo

One of the world's leading car rental brands **Avis** has teamed up with leading global distribution system (GDS) provider, Travelport GDS, to **introduce a new paperless eVoucher for Galileo-connected travel agents**. The agreement with Avis follows the launch of eVouchers last year with Hertz and Sixt.

The eVoucher – effectively an electronic, ticketless confirmation of their booking – works in much the same as an airline e-ticket; doing away with the need for customers to produce proof of deposit or payment when picking up their rental vehicle.

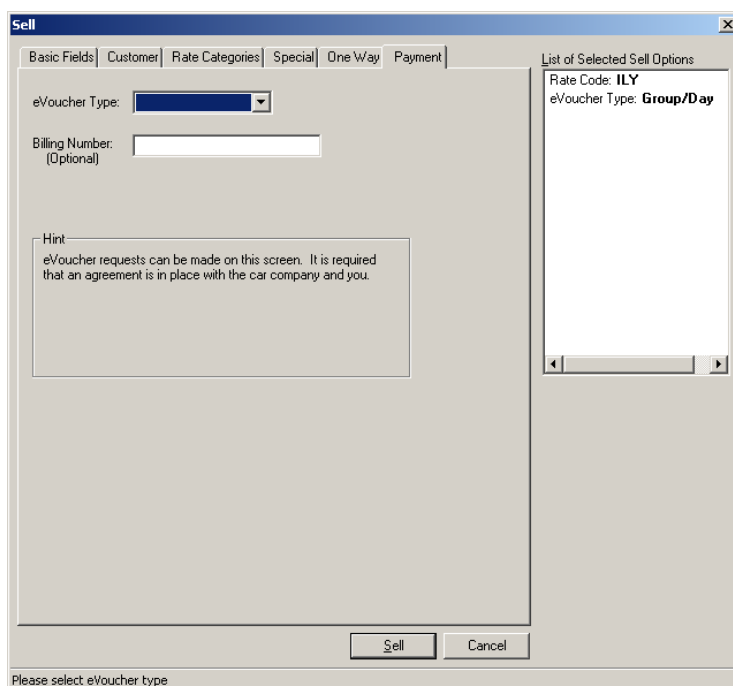

As well as offering significant benefits to customers, **the new system makes booking and managing car rental transactions easier for travel agents**. Through Galileo's industry leading CarMaster system, agents receive real-time confirmation of the booking and are saved the time-consuming tasks of hand-writing rental vouchers and/or faxing voucher payment details to the relevant rental location.

The systems allows agents to take three types of payment for car rental

- Full Credit (the entire cost of rental including special equipment, upgrades and extra days);
- Group/Day (the cost of rental for certain number of days);
- Specific Value (fixed amount towards cost of rental).

**It is required for you to have agreement with e-Voucher supporting vendor (Avis/SIXT/Hertz).**

Then you can use it in Focalpoint (EVV- optional sell field) or Viewpoint:

The screenshot shows a software window titled "Sell" with several tabs: "Basic Fields", "Customer", "Rate Categories", "Special", "One Way", and "Payment". The "Basic Fields" tab is active and contains the following elements:

- eVoucher Type:** A dropdown menu with a blue arrow pointing down.
- Billing Number:** A text input field with the label "(Optional)" below it.
- Hint:** A text box containing the message: "eVoucher requests can be made on this screen. It is required that an agreement is in place with the car company and you."
- List of Selected Sell Options:** A scrollable area on the right side of the window showing:
  - Rate Code: **ILY**
  - eVoucher Type: **Group/Day**
- Buttons:** "Sell" and "Cancel" buttons are located at the bottom center of the window.

At the bottom left of the window, there is a status message: "Please select eVoucher type".
